

Thanks for downloading CashTracker!

You can use this full version of CashTracker for up to 5 days, free. This is the actual full version of the software *with the following limitation:*

After the 5 day trial the software will "lock". You will still be able to access your data, however you will no longer be able to print reports or input any additional data from that point forward.

If you like it you can purchase an Activation Code that unlocks your Cash Tracker software beyond the 5 day trial period. All features will once again be fully functional for one year. Each year thereafter, you will need to purchase an annual Renewal Code which is just \$17.

.....
You can purchase the activation code at
<http://www.HotDogCashTracker.com>. Scroll down to the bottom of the page and click the green button.

- LIMITED TIME SPECIAL OFFER -

If you are one of the next 50 people to purchase an activation code during this limited time period, I will include a SPECIAL REPORT valued at \$225 entitled, "101 Hot Dog Cart Business Deductions" ABSOLUTELY FREE!

This report lists 101 business deductions that could save you over \$500 in taxes, which will far more than pay for your Cash Tracker software!

..... **Free Video Tutorial**

I made an 18 minute tutorial video that shows how to download, install, and use Cash Tracker. You can watch it at:

Error Message?

If you are getting a Run Time Error, try right clicking the yellow Cash Tracker "Hot Dog" icon and choose "Run as administrator". This usually does the trick.

If that doesn't work, you may need to change some settings in Vista. It's easy to do. Here's how:

1) Using Windows Explorer - Navigate to the folder on your computer where you installed this software. NOTE: The default folder is:

C:\Program Files\HomeBoss_CashTracker

2) Locate a file called CashTracker.exe.

3) Highlight that file and "right click" on it.

4) Select the "Properties" Option.

5) Select the "Compatibility" Tab.

6) In the section labeled "Compatibility Mode", put a check mark in the box next to the words: "Run this program in compatibility mode for:"

7) From the drop-down menu, select "Windows XP"

8) In the section labeled "Privilege Level", set to "Run this program as an administrator".

9) Click "Apply" in the lower right corner.

.....

Mac Users

Cash Tracker is built for PCs, but Macs can run it. Go here to learn how: www.hotdogcashtracker.com/mac_users.html
